## Exam Content Outline

# Advanced Ratemaking – Exam 8

## Delivery Format

APPOINTMENT TIME: 4.5 HOURS		
Exam Duration	Scheduled Break	Exam Tutorial, Confidentiality Agreement, End of Exam Survey
4 hours	15 min	15 min

## Exam Item Types

Candidates may see the following item types in the CAS examinations. Candidates should become familiar with these item types and sample questions will be available in 2024.

### Multiple Choice

Multiple answer choices are presented after a problem with only one correct answer.

### Multiple Selection

Multiple answer choices are presented after a problem with more than one correct answer.

### Point and Click

An image is presented after a problem where the candidate must identify the correct area of the image by clicking on the correct location in the image.

### Fill in the Blank

One or more blank sections are presented after the problem or within a statement where the candidate must input the correct response(s).

### Matching

Content columns presented after a problem where the candidate must correctly match content from one column to another.

### Constructed Response

A blank response area is presented after a problem where candidates must construct and develop their own answer.

### Spreadsheet

Spreadsheet-type items are displayed to the candidate in a spreadsheet format and candidates can make use of most spreadsheet functions. Please review the testing guide prior to sitting for your exam to note any differences between the Pearson Vue testing environment and common spreadsheet software (e.g., Excel, Google Sheets).

Expertise. Insight.  
Solutions.

## Exam Cognitive Level

Each task is tied to a certain type of mental operation or thinking skill, which is called the cognitive level. ACAS and FCAS use four cognitive levels, and every examination item is authored to address both the task and one of the following cognitive levels paired with that task (*sample questions coming soon*).

### Remember: 0-10%

Tests the ability of the candidate to recall or remember knowledge or facts.

### Understand and Apply: 20-30%

Measures the candidate's ability to understand and apply ideas and concepts to new situations.

### Analyze and Evaluate: 50-60%

Requires the candidate to analyze information, combine ideas and concepts, and justify a position resulting from that combination.

### Create: 10-20%

Requires the candidate to synthesize conclusions by evaluating the validity of ideas and concepts.

## Exam Section Details

DOMAINS	DOMAIN WEIGHT
A. Classification Ratemaking	60-80%
B. Excess, Deductible, and Individual Risk Pricing	20-40%

Expertise. Insight.  
Solutions.

## A. Classification Ratemaking

Candidates are expected to go beyond mechanical construction to the comparison and evaluation of alternative classification ratemaking schemes.

TASKS
1. Interpret classification ratemaking models (e.g., GLM).
2. Evaluate the validity of rate classes.
3. Measure statistical significance of rate classes including estimates of loss costs of rate classes.
4. Measure and assess model fit (e.g., use results for a rating plan).
5. Evaluate classification ratemaking models (e.g., benchmark, recalibrate variables, implementation).
6. Describe approaches to stripping out rating factors using predictive models for further analysis (e.g., territorial).
7. Describe approaches to modeling with high dimensional variables (e.g., vehicle make and model, workers compensation classes).
8. Evaluate combinations of ratemaking component models (e.g., frequency/severity).

Solutions.

## B. Excess, Deductible, and Individual Risk Rating

Candidates will be able to design and manage excess, deductible, and individual risk rating systems.

### Excess and Deductible Rating

Candidates will be able to apply general knowledge and understanding of excess coverages and the problems inherent in pricing these coverages for different lines of business.

### Experience Rating

Candidates will be able to adjust an individual risk's rate to reflect the extent to which that risk's own experience identifies it as being different from other risks in the same class.

### Retrospective and Loss Sensitive Rating

Candidates will be able to make adjustments to individual risk premium after policy expiration in response to actual loss and expenses associated with the policy.

TASKS
1. Estimate aggregate loss distributions.
2. Determine expected losses by layer of insurance by applying frequency and severity distributions.
3. Calculate the cost of the layer of risk given the overall loss cost.
4. Analyze a loss sensitive rating plan (e.g., retrospective rating).
5. Analyze an experiencing rating plan.
6. Assess the effectiveness of rating plans.
